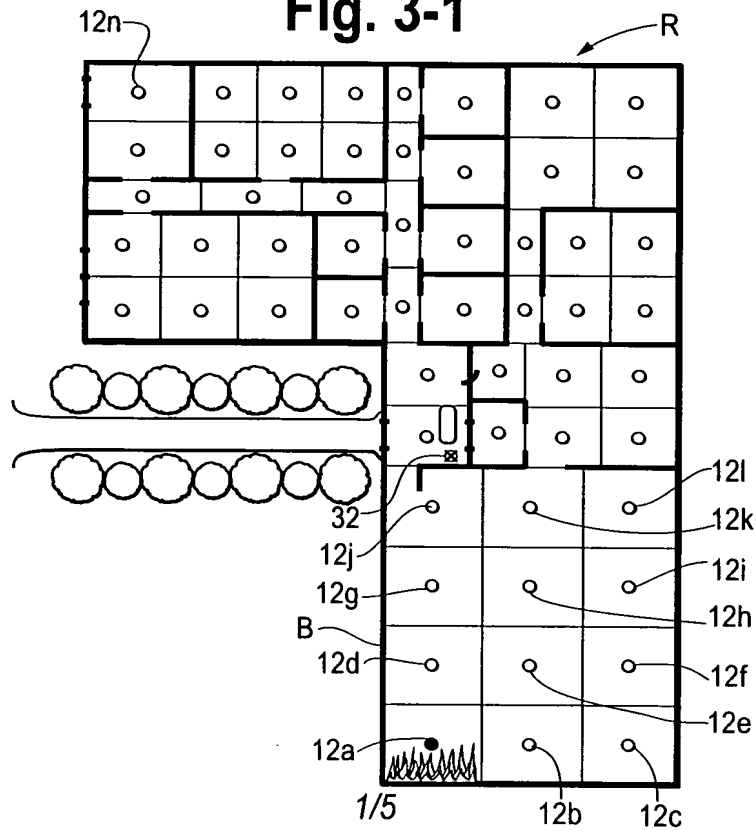

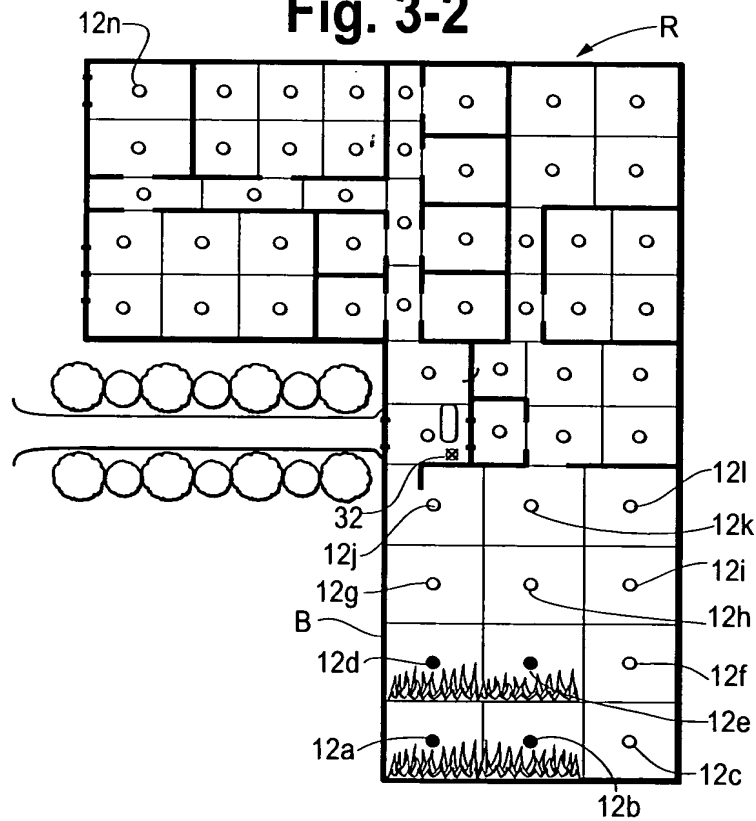

Fig. 3-2

The diagram illustrates a grid-based system with two primary sections, R and B. Section R is located at the top right and consists of a grid of squares. Some squares contain small circles, while others are empty or contain smaller geometric shapes like rectangles. An arrow labeled 'R' points towards this section. Section B is located below R and also features a grid of squares. In this section, some squares contain circles, while others contain wavy horizontal lines, suggesting a textured or patterned surface. Various labels point to specific elements: '12n' points to a circle in the top left; '12j', '12g', '12d', '12a', '12k', '12i', '12h', '12f', '12e', '12c', and '12b' point to different squares or circles within the grids; '32' points to a small square in section B; and 'R' and 'B' label their respective sections.
